Senior Product Manager (R&D) AI Platforms, LLM Orchestration & Agentic Automation

AI-focused Product Manager who has taken LLM-powered products from experimentation to production at scale. I own the end-to-end lifecycle of Generative AI tools LLM orchestration, agentic workflows, RAG-based retrieval, and embedding-model strategy built on top of complex backend and data services. I work backwards from customer value, lead cross-functional teams across backend, frontend, and research, and translate technical trade-offs into business narratives for leadership. Inventor on two filed patents and author of two pre-prints on applied AI for technology and market intelligence. I bring deep AI-product craft and am actively growing into broader platform and ecosystem scope.

WORK EXPERIENCE 6+ years in IP & R&D and Generative AI product management

SENIOR PRODUCT MANAGER – R&D – Xlscout.ai (Ontario, Canada) – June 2025 – Present

Own the strategy and delivery of a portfolio of LLM-powered IP analytics products built on shared AI infrastructure.

- Drove growth in portfolio ARR from \$1.32M to \$2.61M (nearly 2x) over two years by leading the development and production rollout of a Generative AI product suite, including ClaimChart LLM, Standigger LLM, Invalidator LLM, Patdigger, and Product-to-Patent.
- Define product vision and roadmap for Generative AI tools Claimchart LLM, Standigger LLM, Invalidator LLM, Patdigger, and Product-to-Patent moving each from AI experimentation to production-grade automation.
- Drive the design of reusable AI infrastructure: LLM orchestration across multiple models, agentic/RAG retrieval patterns, and open-source embedding-model training strategy that product teams build on.
- Work backwards from customer value, pairing deep domain understanding with the AI stack to uncover opportunities in portfolio management, licensing identification, monetization, and technology transfer.
- Apply Prompt Engineering to standardize and structure outputs across different LLMs, improving reliability and quality of automated workflows.
- Act as the bridge between research, engineering, and leadership translating technical trade-offs into commercial narratives that shape product strategy.

PRODUCT MANAGER – R&D – Xlscout.ai (Ontario, Canada) – Aug 2023 – May 2025

Led the product development process for LLM-based tools, collaborating across backend, frontend, and research teams to raise the quality of the user experience.

- Shipped customized automation for patent categorization and portfolio ranking tool including Generative AI tools Claimchart LLM, Standigger LLM, turning manual, expert-heavy workflows into scalable AI-driven processes.
- Championed B2B-as-intuitive-as-B2C: drove consistent, user-centric experiences across enterprise tools as a differentiator.
- Delivered Technology and Competitive benchmark reports and applied generative AI to extract and structure market data, strengthening in-house IP Automation solutions.
- Established and refined standard procedures and validation practices for AI tools through continuous-improvement initiatives.
- Handled enterprise client engagements, managing technical stakeholders and aligning product capability with their needs.

SENIOR PATENT RESEARCH ANALYST – TT Consultants Pvt. Ltd. (Punjab, India) – May 2022 – Jul 2023

Contributed as Business Development support under the AVP Operations, bridging research depth and commercial strategy.

- Drove alignment across functions prepared approach papers and proposals for pilot studies and client engagements without direct authority.
- Monitored IP search tools and competitive intelligence, conducting technology scouting to enhance operational projects.
- Guided teams across multidisciplinary technology-landscape and scouting initiatives.

PATENT RESEARCH ANALYST – TT Consultants Pvt. Ltd. (Punjab, India) – Oct 2020 – Apr 2022

Patent Analyst across Life Science domains Biomedical Engineering, Industrial Biotechnology, Bio-process Engineering, and Bioinformatics.

- Conducted Patentability, Invalidity, FTO, Landscape, and Infringement analyses using query-based tools and databases.
- Delivered actionable, data-driven insights supporting clients' strategic IP decisions.

JUNIOR PATENT RESEARCH ANALYST – TT Consultants Pvt. Ltd. (Punjab, India) – Aug 2019 – Sep 2020

Conducted diverse IP analysis searches and improved underlying workflow models.

- Executed Invalidity, FTO, Novelty, and Infringement projects across domain and cross-domain studies.
- Curated technical insights and enhanced workflow models for searches, techniques, and reports.

CORE EXPERTISE

Generative AI Product Management • LLM Orchestration • Agentic Workflows & RAG Patterns • Embedding-Model Strategy • Prompt Engineering • MCP • Langchain • Plugins • Connectors • AI Experimentation → Production • Cross-Functional Leadership (Backend / Frontend / Research) • Executive Communication & Stakeholder Influence • Customer-Backwards Discovery • Technology & Competitive Intelligence • Patent Portfolio Ranking • FTO / Invalidity / Landscape Analysis • Customer Success Manager

PATENTS, PUBLICATIONS & RECOGNITION

- **Patent Application** (US-20260030308-A1): System and method for determining relevant entities and products using an LLM model filed July 2024.
- **Patent Application** (US-202418625229-A): Systems and methods for generating suggestions to enhance solutions for a seed problem using LLMs and sustainable technologies filed April 2024.
- **Pre-print** (arXiv:2507.20322): "Artificial Intelligence in Patent and Market Intelligence: A New Paradigm for Technology Scouting", July 2025.
- **Pre-print** (arXiv:2509.00958): "A Hybrid AI Framework for Strategic Patent Portfolio Pruning: Learning-to-Rank and Market-Need Analysis for Technology Transfer Optimization", September 2025.
- Awarded Strategic AI Consultant (2025) and Employee of the Year (2020, 2021, 2022, 2024), plus MVP, Employee of the Quarter, and Best Newcomer across tenure.

EDUCATION

Bachelor of Technology – Biotechnology – Lovely Professional University (2019) – CGPA 8.03/10

Certifications: HMX Fundamentals (Genetics), Harvard Medical School | Python Basics, University of Michigan | Data Science, IBM | 9 licenses & certifications across Aspiring Minds, Array-Gen, ISRO, HMX.
